

Preface

Established on January 28, 2000, Coast Guard Administration (CGA) has ever since been responsible for safeguarding marine region and coastal order for of Taiwan area, as well as protecting and using the marine resources. With enthusiastic implementation of the five core missions as "Maritime Public Security," "Fishing Rights Protection," "Search and Rescue," "Marine Affairs," and "Marine Conservation", the performances are tremendous and affirmed deeply the public because all work associates have done their best work diligently, cautiously and conscientiously. Facing the environmental change of law enforcement at sea area, the evolution of the situation in cross-strait exchanges and international trends in ocean affairs in the future, CGA will further, on the existing strong bases, carry out ship development plans for marine patrols, innovate duty patterns, enrich patrol energy, and defend sovereignty and fishery rights; strengthen the regional rescue mechanism to enrich the disaster prevention and rescue energy at sea and maintain the safety of people's lives and property; implementing "An Hai" and "An Kang" projects to prevent smuggling, illegal immigration and disease invasion, and also actively expand international contact network, promote cross-border cooperation in combating crimes, and maintain maritime and coastal security.

In order to let all sectors of society understand the result of business carried out by CGA and its development, CGA has compiled the annual statistics report every year since 2002 in order to show the status of business performance, staff statistics and budget planning of CGA. This annual statistics report has been presented in both Chinese and English versions since 2008, but which was published electronically only since 2016 due to in response to the IT development, and the implementation of Energy Efficiency and Paper Reduction policy. The 2017 CGA annual statistics report as usual basing on the structure of annual statistics report over years is divided into three parts as summary analysis, statistical tables and appendixes. The Chinese and English reports will be available on CGA's World Wide Web for application by all circles. Because the materials are wide-ranging, and if there is any omission, your correction and instructions are highly appreciated.
