海巡人員應用港區監控系統，成功破獲數量龐大走私梨接穗。

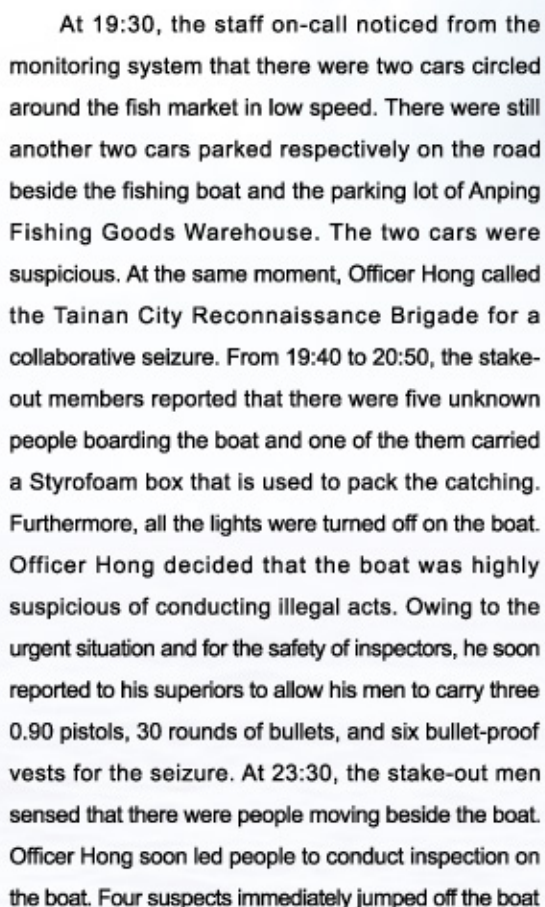

The CGA members had used well of the monitoring system in the port to successfully seize a large amount of smuggled pear scions.

**海**巡署南部地區巡防局第五二大隊安平漁港安檢所於96年12月10日1600時執行高雄小港籍「富春盛號（CT4-1649）」漁船安檢勤務時，發現該漁船中並無漁獲，但因該船為注檢船筏且吃水線已超過載重線，遂不動聲色先予放行，旋即運用「安檢資訊系統」查詢比對該船出港地為馬公漁港安檢所及出港時間。該航程依正常航行時間僅耗費約六小時即可到達，然該船航行時間使用約八小時，有2小時可從事捕撈作業，且船上船員有6人，惟船上卻無任何漁獲，經安

Anping Fishing Port Inspection Office, Coast Patrol Corps 5-2 of Southern Coastal Patrol Office, enforced a security check on the Fu Chun Sheng (CT4-1649) from Kaohsiung at 16:00 on December 10, 2007, the CGA members found that there was no fishing on the boat. However, the water line of the boat was below the surface, which was suspicious fact, so the members allowed the boat to enter the port without further treatment. The inspection team soon cross checked the information of the boat on the Security Checking System, and found out when did the boat leave Makong Harbor. Normally speaking, the boat only needed six hours to get to the port, however, the boat used eight hours. The CGA guessed that the six fishermen onboard spent two hours fishing, but there was no fish catching on the boat. Station Officer Hong Rong-fa was suspected the purpose of the boat after collecting all the relating information, therefore, he asked the staff on-call to monitor the location of the boat with the monitoring system. He then sent back-up member, Corporal Jhuang Ciao-jyun, led another soldier to follow the boat. The boat owner and two other fishermen were still on the boat until 18:00.

同日晚間1930時值班人員由港區監控系統發現有兩部自小客車採前後慢速行駛方式，於遠洋漁市場周邊繞行徘徊，另有兩部自小客車停放於鄰近「富」船之馬路旁及「安平漁貨管理中心」停車場，行跡可疑，洪所長即以電話聯繫台南市查緝隊共同投入查緝。於1940至2050時，埋伏

人員回報共有5名不詳人員進入該船，其中1人持包裝漁貨之保麗龍箱上船，且船上均未開啓任何燈光。洪所長研判該船從事不法活動可能性極高，由於情況緊急，為考量查緝人員安全，旋即向上級報備攜帶90手槍3把、子彈30發及防彈背心6件備用。2330時埋伏人員發現「富」船旁有人影晃動，洪所長即率人前往實施查緝，4名嫌犯立即跳入水中登上一艘船籍不明膠筏，往港區南方急駛逃逸，洪所長隨即通報偵巡艇組及第四海巡隊前往追緝。圍捕過程中因嫌犯試圖駕車衝撞，為嚇阻嫌犯查緝人員即對空鳴槍9發，當場逮捕船長及搬運工2名嫌犯，並於船上密窩中查獲躲藏之嫌犯3名，另起出以麻袋包裝走私之梨接穗乙批共計422箱（每箱640枝，共27萬800枝）。

安平漁港安檢所所長及執檢人員警覺性高，能察覺可疑徵候並交叉比對安檢資訊系統，且能妥善運用港區監控系統監控及蒐證，彈性規劃埋伏勤務，於第一時間完成相關勤務佈署，確實掌握查緝先機，處理態度謹慎，圓滿達成查緝任務，有效遏止不法，足可提供各單位於教育訓練時機宣教所屬知悉。👍

and onto an unidentified raft. They soon drove the raft to the south of the port in full speed. Officer Hong informed the Patrol Boat Team and 4th Flotilla to catch the escaped suspects. When the law enforcement people tried to catch them, suspects attempted to escape with a car. In order to threaten them, inspectors fired nine shots into the air and soon the boat owner and two other suspects were soon arrested. Three other suspects hiding on the boat were also apprehended. Inspectors seized 422 boxes of smuggled pear scions. Each box was cased with 640 pear branches and the total was 278,000.

The Station Officer and the inspecting members at the Anping Inspection Office have high sense of alertness to detect any suspicious traits. They also took advantage of the Security Checking System to cross examine the boat's information. They used well of the monitoring system in the harbor area and tried everything possible to collect evidence. With flexible planning of stake-out mission, they completed their deployment in the shortest time possible. This allowed them to take hold of the situation and in the end completed the seizure mission with their cautious attitude. Their action effectively stopped the crime and can be served as an example for all units in the training material.
